## Information Request Form

KRAG is able to provide database search requests to a wide range of organisations and individuals. To ensure that the information provided is as accurate as possible, we request that the following form is completed. KRAG charges a nominal sum to cover the administrative costs of maintaining the recording database.

### Contact Information:

Name:	Date:

### Please Tick:

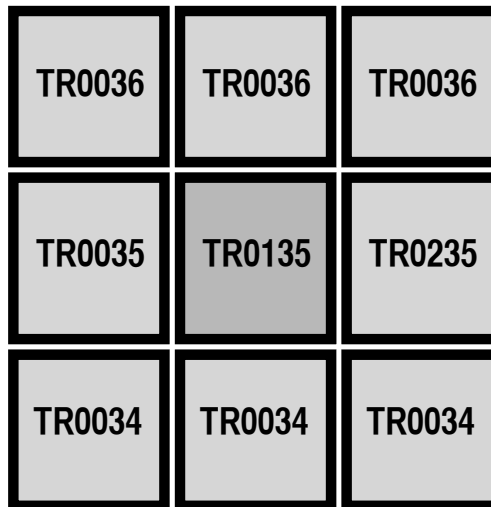

Commercial User    £60	Corporate Member    £54	Private Individual    £10
KRAG Recorder <i>free</i>	Conservation Org. <i>free</i>	Education Org. <i>free</i>

### Requested Search Area:

Search Area:
Grid Reference:
Your Request Ref. No.:

Please email completed forms to  
[b.brady@calummaecologicalservices.com](mailto:b.brady@calummaecologicalservices.com)

Database searches will generate lists of species observations from a 9 km square that is based on a supplied grid reference. For example, the grid reference TR 010 350 will result in a list of records from the following 1 km squares:

In some regions, there may be no available data. Of course this doesn't necessarily mean that species are absent, only that there has been limited survey effort. Since it is useful to know the location of the nearest records, the database search will also generate a summary sheet that identifies the distance and direction to the closest recorded great crested newt and reptile locations.

Below is an example of a database search return.

### Kent Reptile and Amphibian Group

#### Herpetofauna Database Search Summary

**Enquiry No:** CES/005

**On Behalf of:** Acme Consultancy Ltd

**Search Area:** Hamstreet

**Grid Reference:** TR 010 350

(Search encompasses 9 km square based on this central grid reference)

**Amphibians Recorded in Search Area:**

- Common Frog
- Great Crested Newt
- Palmlate Newt
- Small Newt Sp.
- Smooth Newt

**Reptiles Recorded in Search Area:**

- Grass Snake
- Slow-worm
- Viviparous Lizard

-----

The closest recorded Great Crested Newt site is located at Ham Street Woods NNR, 0.5 km to the S (record id: 2828).

-----

The closest recorded reptile site is for Grass Snake, located at Ham Street Woods NNR, 0.22 km to the SW (record id: 5374).

-----

The Kent Reptile and Amphibian Group is a non-profit making organisation that promotes the conservation of reptiles and amphibians. Although the KRAG recording database contains several thousands of records, the availability of information detailed within this search is directly related to survey effort. A lack of records does not necessarily indicate the absence of a species. KRAG recommends that a thorough herpetofauna survey is undertaken following the most recently published best practice guidelines. More information on best practice is available on the KRAG website ([www.kentarg.org](http://www.kentarg.org)).

KRAG welcomes the submission of additional records from those undertaking survey work in Kent.
